What are “WebLinks”?

- **WebLinks** – Are used to share information from this “OurChapter” website to your existing website, without the need for redundancy.

Example: You specify your officers title in the “Roster” function of the “OurChapter” website. You can use a WebLink to display your officers on your existing website with a simple “WebLink”, without the need to enter in twice. Also, if you change your officers in the “OurChapter” website, those changes will automatically be updated on your existing website.

A “WebLink” is simply a special piece of HTML code to share information.

Note: Some Weblinks have special security codes to protect your information.

What “WebLinks” are available?
